Hoofdstuk 2 : installeren & aansluiten van de electronica

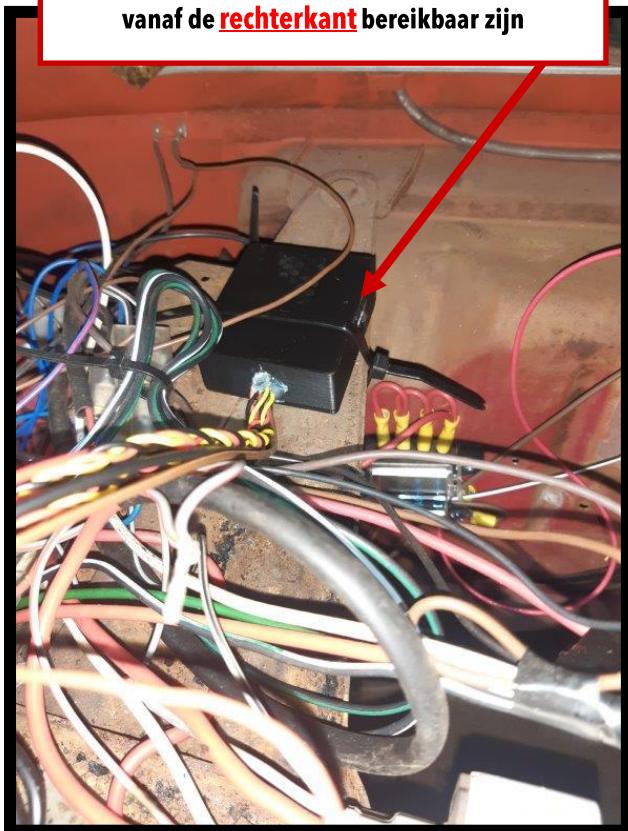

Zwarte kabel = massa

Rode kabel = contact geschakelde +

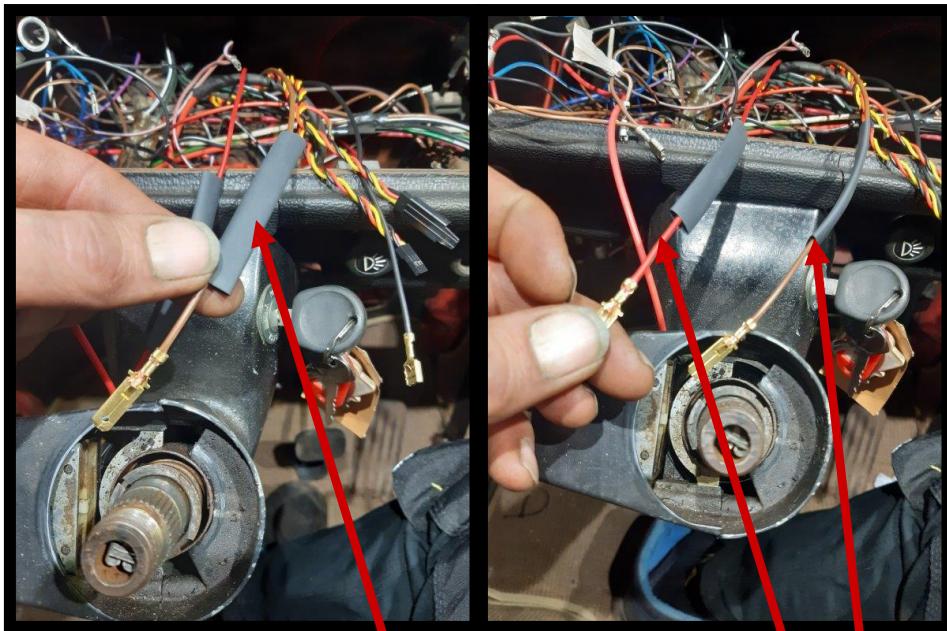

Bruine kabel = de kabel naar de tankvlotter

 Elektronica kastje installeren op de „brug“ onder de teller-unit
LET OP : kastje zo installeren dat de Switches vanaf de **rechterkant** bereikbaar zijn

 Neem de bijgeleverde krimpkous uit de verpakking

 **Schuif de krimpkous over zowel de Bruine als de Rode kabels van de Classic Evo Gauge**

Classic EVO GAUGE

 **Verbind de bruine kabel van de
Classic Evo Gauge met de Bruin/Zwarte kabel
(dit is de kabel die gaat van de vlotter naar de
originele meter) van de auto**

 **Schuif de krimpkous over de kabelschoenen
zodat deze alle blanke delen afdekt en krimp de
kous met een warmte bron zoals een verfstripper,
aansteker of gasbrandertje**

Verbind de Rode kabel van de Classic Evo Gauge met de Zwarte kabel (dit is de contact geschakelde + van de originele meter).

Voor de correcte montage , neem het 2^{de} schoentje aan de originele kabelstreng.

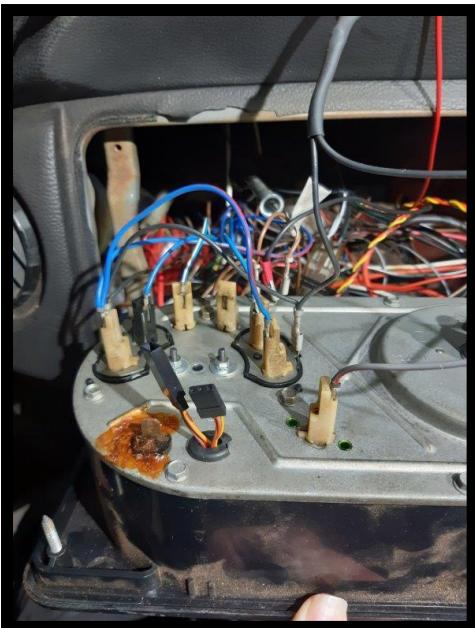

Schuif de krimpkous over de kabelschoenen zodat deze alle blanke delen afdekt en krimp de kous met een warmte bron zoals een verfstripper , of gasbrandertje

**Programming first version of the CEG fuel gauge
Programmierung der erste version der CEG Tankanzeige
programmering van de eerste versie CEG brandstofmeter**

Hoofdstuk 3: Programmeren en ijken van C-E-G Benzinemeter op de bestaande tankvlotter

Voor het programmeren moet de Accupool weer worden vastgezet

Dip-switch : UP = ON , DOWN = OFF

Dip-switch 1 : „ON“ =Run Programma 1 met leds „brightness LOW“

Dip-switch 2 : „ON“ =Run Programma 2 met leds „brightness HIGH“

Dip-switch 3 : „ON“ =Leermodus vlotter „TANK LEEG“!!!!

Dip-switch 4 : „ON“ =Leermodus vlotter „TANK VOL“!!!!

LET OP !!!! : voor een correct functioneren mag er maar één Dip-switch tegelijk op positie „ON“ staan

OPSTARTEN

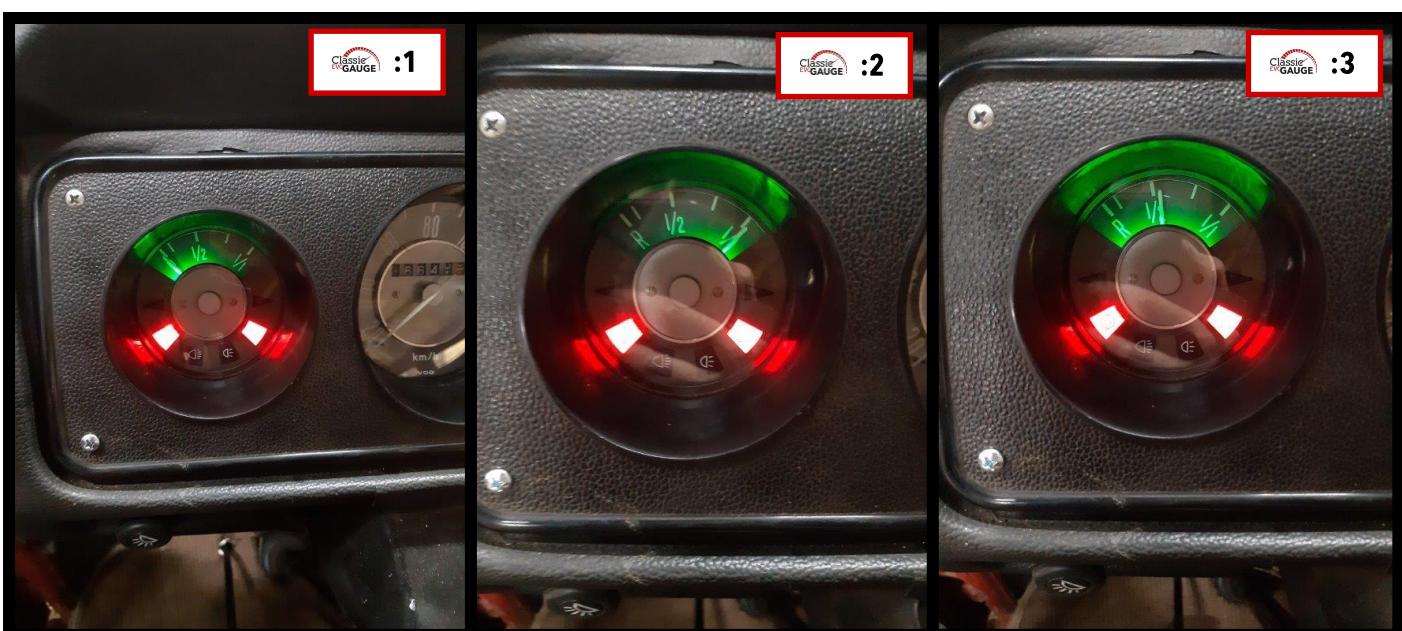

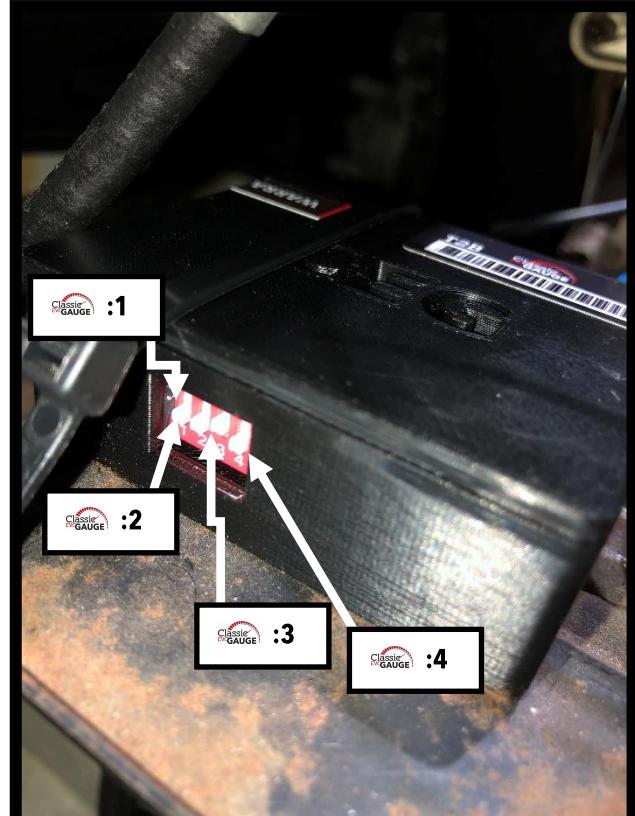

Opstarten : Elke keer dat de auto op contact staat zal de meter zijn opstart fase afwerken dit gaat als volgt :

1: wijzer gaat naar uiterst links, gevolgd door een LED bevestiging.

2: daarna naar uiterst rechts wederom gevolgd door een LED bevestiging.

3: Ten slotte gaat de wijzer naar de midden positie gevolgd door een dubbele LED indicatie .. zie hieronder.

NU dooft de GROENE LED en gaat de wijzer van de meter naar de actuele stand van de brandstof

PROGRAMMEREN TANKSTAND „LEEG“ !!!

VULLEN VANAF STAND „LEEG“ + UITLEG RESERVE

 Bij een Lege Tank (het einde van de reserve) zal de wijzerplaat van de Classic Evo Gauge Fel Rood oplichten , en zal tijdens het vullen de gehele reserve de wijzerplaat van de Classic Evo Gauge oranje zijn.

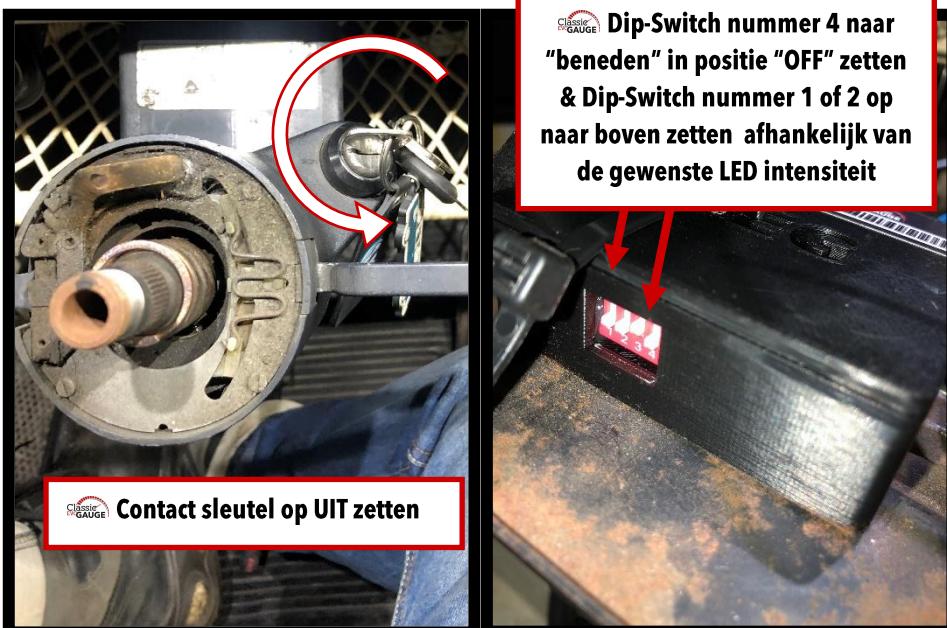

PROGRAMMEREN TANKSTAND „VOL“ !!!

Let op : Het programmeren van „TANK VOL“ hoeft niet direct na het inlezen van „TANK LEEG“ te gebeuren.

In de Classic Evo Gauge , staat een „basis waarde“ voor modus “Tank Vol” voorgeprogrammeerd die ongeveer moet kloppen.

Bij een volgende tankbeurt kan dan „TANK VOL“ alsnog worden in-gelezen , zie hieronder hoe :

LET OP !!!!! : ZORG VOOR HET ZUIVER INLEZEN VAN MODUS “TANK VOL” DAT DE AUTO VOLLEDIG IS AFGETANKT
